

Hi-Q®/ERMX intrRlox® and Hi-Q®/ERMXC intrRlox®

Patented slip-off proof mini clamping nuts

ER Standard

Compatible with any ER systems, independent of manufacturer

Coolant flush

Suitable with available coolant flush and sealing disks

intrRlox®

Patented slip-off safety with intelligent nut profile

Safe handling thanks to the patented intrRlox® profile

Design is ideally suited for machines with limited space

Interlocking design guarantees safe handling in tight spaces

Covers ER 8 to ER 25, clamping range 0.2 - 17mm

Application with sealing disk/coolant flush disk

The Hi-Q®/ERMXC clamping nut is intended for use with the sealing disk system DS/ER and the coolant flush system KS/ER. The disk system allows the use of all standard ER collets, ultraprecision collets and tapping collets for coolant through tools.

- // Up to 150 bar / 2100 PSI coolant pressure
- // Prevents dirt and chips from entering the collet

Accessories are not included in delivery.

Expert advice

BLANK DS & KS / ER are available and can be used as machining blank for specific sizes or as sealing disk for double-sided driven tools.

Swiss quality standard

Our products marked Swiss made are manufactured at our headquarters in Tenniken, Switzerland.

// The mini clamping nut **Hi-Q® / ERM** is used where minimal external diameters are essential (e.g., machining space is very limited). The wrench design is not interlocking.

// Safe handling thanks to the patented **intRlox®** profile and lock-in wrench

// Slip-off proof design with all advantages of the regular mini clamping nuts

„Say goodbye to smashed knuckles, gashed fingers, and lost productivity“
